* Art Unit: 2814

The amendment filed September 19, 2002 has been entered and made of record as paper no. 7.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Rostoker et al (of record).

Rostoker discloses in figure 4 a semiconductor device package comprising a semiconductor device (420) formed on a substrate (410), a mold cap (440), and a heat spreader (430) being entirely external to the mold cap.

In re claim 2, it would have been obvious that the semiconductor device can be electrically connected to the substrate by wire bonds and the mold cap covers at least

Application/Control Number: 09/893,356

✓ Art Unit: 2814

the upper surface of the substrate and the wire bonds. The wire bonds are well known as shown in figure 7 of Rostoker and Applicants' prior art figures 1 and 2.

In re claim 3, figure 4 of Rostoker clearly shows the claimed structure.

In re claims 4-8, it would have been obvious to one of ordinary skill in the art to form the downwardly protruding portion of the heat spreader with any shape in plan view.

In re claim 9, it would have been obvious to one of ordinary skill in the art to form the package at any height that sufficiently protects the semiconductor device.

In re claim 10, the heat spreader (430) does not contact the substrate (410).

Claims 1-10 are alternatively rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Johnson et al (of record).

Johnson discloses in figure 10 a semiconductor device package comprising a semiconductor device (14) formed on a substrate (12), a mold cap (24), and a heat spreader (22) being entirely external to the mold cap.

In re claim 2, it would have been obvious that the semiconductor device can be electrically connected to the substrate by wire bonds and the mold cap covers at least the upper surface of the substrate and the wire bonds. The wire bonds are well known as shown Applicants' prior art figures 1 and 2.

In re claim 3, figure 12 of Johnson clearly shows the claimed structure.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 09/893,356

Art Unit: 2814

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Examiner Ngan Ngo at telephone number (703) 308-4938. The fax number for the Art unit is (703) 308-7722.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0956.
